Awards, Scholarships, And A Talk On Leadership Qualities Featured At Annual 4-H Leaders' Banquet

The annual Lancaster County 4-H Leaders' Banquet Monday night at the Plain & Fancy Farm, was the scene of considerable "award and recognition" activity, with close to 200 persons attending

Among the 26 leaders cited for their milestones of service to 4-H youth — 5, 10, 15 and 20 years — were C Warren Leminger, Denver R2, and Mrs Willis Shoemaker, Bainbridge Victor Longenecker was recognized for his 32 years of leadership activities

Winner of the top 4-H News Reporter award was Carol Murry, of Lititz R2 Her blue ribbon was presented by Don Timmons in behalf of **Lancaster Farming.** Assistant county agent Harvey Gipe, representing the county extension service, presented the second News Reporter ribbon to Paul Scheuing, of the New Providence Club. Both reporters will be awarded silver trays at a later date

Scholarships were presented by associate county agent Arnold G Lueck to Pat Yunginger, who will enter nurses training, Linda Young, who will major in home economics at Indiana State University, Indiana, Pa, Nancy Risser, who will enter nurses training and a degree program at Alfred University, Alfred, N.Y.; Eric Stoner, who will study agronomy at Penn State University, and Evelyn Groff, who is a student at Elizabethtown College

The $450 presented in the form of scholarships was part of a $600 contribution made by the Lancaster County Bankers' Association The balance of the grant is used for other 4-H activities

Lueck announced that two, $100 scholarships from the Kiwanis Club will be available in June to any 4-H'er in agriculture or home economics. He also said that May 20 will be the deadline for application for the two, $250 scholarships being offered by the Farm and Home Foundation for prospective college freshmen in agriculture and home economics.

Government By Presidential Rule Is Contrary To America's Best Interests, Empie Tells Farmers

Speaking at the Lancaster County Farmers Association's annual Spring meeting, a Chester County dairy farmer warned Thursday night that, in the words of Senator Everett Dirksen "they are changing America and you won't like it"

J Carl Empie, vice-president of the Pennsylvania Farmers' Association, discussed this statement from three governmental points of departure — legislative, judicial, and executive with the main emphasis on the latter

We are getting into government by president, and away from constitutional government Empie said He cited the fact that in the last session of Congress nearly every major bill originated in the White House A fact that somewhat more than one generation ago would never have been tolerated by Congress He went on to point out that Senator Williams of Delaware, upon investigation, learned that only a fraction of these major bills had been priced out in advance by the administration to see what they would cost the U S taxpayer

Empie particularly attacked the minimum wage bill which is presently on the floor of the House of Representatives

"This bill, if passed, is going to take it out of the farmers' hide," Empie said He stated that for every dollar the farmer spends, he will have to earn between five and ten. "Al-

Farm & Home Launches Scholarship Program

The Lancaster County Farm and Home Foundation recently announced that one of its prime objectives, encouraging the higher education of youth in the county, is being met by the introduction of two scholarship awards for 1966

The F & H scholarships, one each in the fields of agriculture and home economics, have been made possible by the special contributions of two members of the Board of Directors who prefer to remain anonymous These special donations were made so the scholarship phase of the Foundation project could get started this Spring

Each scholarship award will be for $250, and may be used to defray tuition, fees, or room and board expenses at any accredited college or university which offers a course of study in agriculture and/or home economics.

All interested youths are

New Leukosis Research Study Approved for Pa.

HARRISBURG — Research on leukosis, a poultry disease that causes $80 million in losses annually to the nation's chicken farmers, was authorized this week by the Pennsylvania Department of Agriculture

Secretary Leland H Bull said the study will be made by Penn State University under contract with his department He estimated that, if it is successful, it could save Pennsylvania poultrymen at least $4 million a year

Two additional poultry research projects were also initiated, one, on disinfectants for hatchery sanitation, and another on the utilization and disposal of poultry and other agricultural wastes. Both to be done by Penn State.

Poultry, Secretary Bull pointed out, stands second only to dairying among the Commonwealth's leading agricultural industries. Including eggs, it accounted in 1965 for $144 million, or nearly 18 percent, of

Leaders' Council Elects Officers

Following the annual banquet of the Lancaster County 4-H Leaders' Council at the Plain & Fancy Farm on Monday night, the 10-member board of directors met to choose officers for 1966.

Elected to one-year terms were: Maurice Herr, Refton, president; Fred Linton, Quarryville R2, vice-president; and Mrs Ivan Eberly, Ephrata R1, secretary- treasurer

Herr succeeds Mrs. Herbert Royer, 2025 Oregon Pike, Lancaster.

The board of directors is composed of five members each from agriculture and home economics clubs. Its purpose is to set 4-H leader policy,

SERVICE IS OUR BUSINESS AT EASTERN

Eastern Milk Producers is a bargaining organization operated solely by and for milk-producing dairy farmers. And its only business is serving the interests of more than 10,000 Eastern producer members throughout the northeast—in matters ranging from individual farm problems to important legislative issues at all levels of government.

The depth and breadth of the scope of these services is indicated, in part only, by the comments of the following Eastern members:

GUARANTEED PRICE:

"Thanks to Eastern's blend price guarantee, I received pay for my April milk."

—H. C. Izard,
Earlville, N Y

QUARANTINE PROTECTION:

"Eastern helped us when we were in trouble. Under quarantine, we still received pay for 75% of our milk."

—Mrs Ella Ishler
Bellefonte Pa

BULK TANK CALIBRATION:

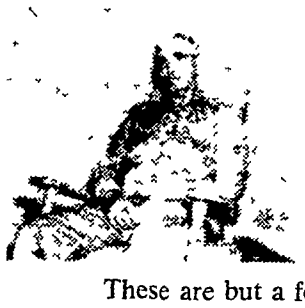
"Calibration of my bulk tank by Eastern paid dividends"

—Gale Chamberlain,
Columbia Crossroads, Pa.

FAT TEST VERIFICATION:

"My butterfat test at the plant was verified by your field man. This service was appreciated"

—Charles Smigleski,
Bainbridge, N.Y.



HEALTH PLAN:

"I'm thankful for Eastern's health plan. It helped keep the farm going while I was sick for two years"

—Cyrus Hoyt,
Maplecrest, N.Y

These are but a few of the countless benefits that only a financially sound, debt-free, producer bargaining co-op can offer . . . while asking the lowest membership dues For complete information on Eastern membership advantages, contact your local representative or write direct to Executive Secretary John C. York at Eastern headquarters.

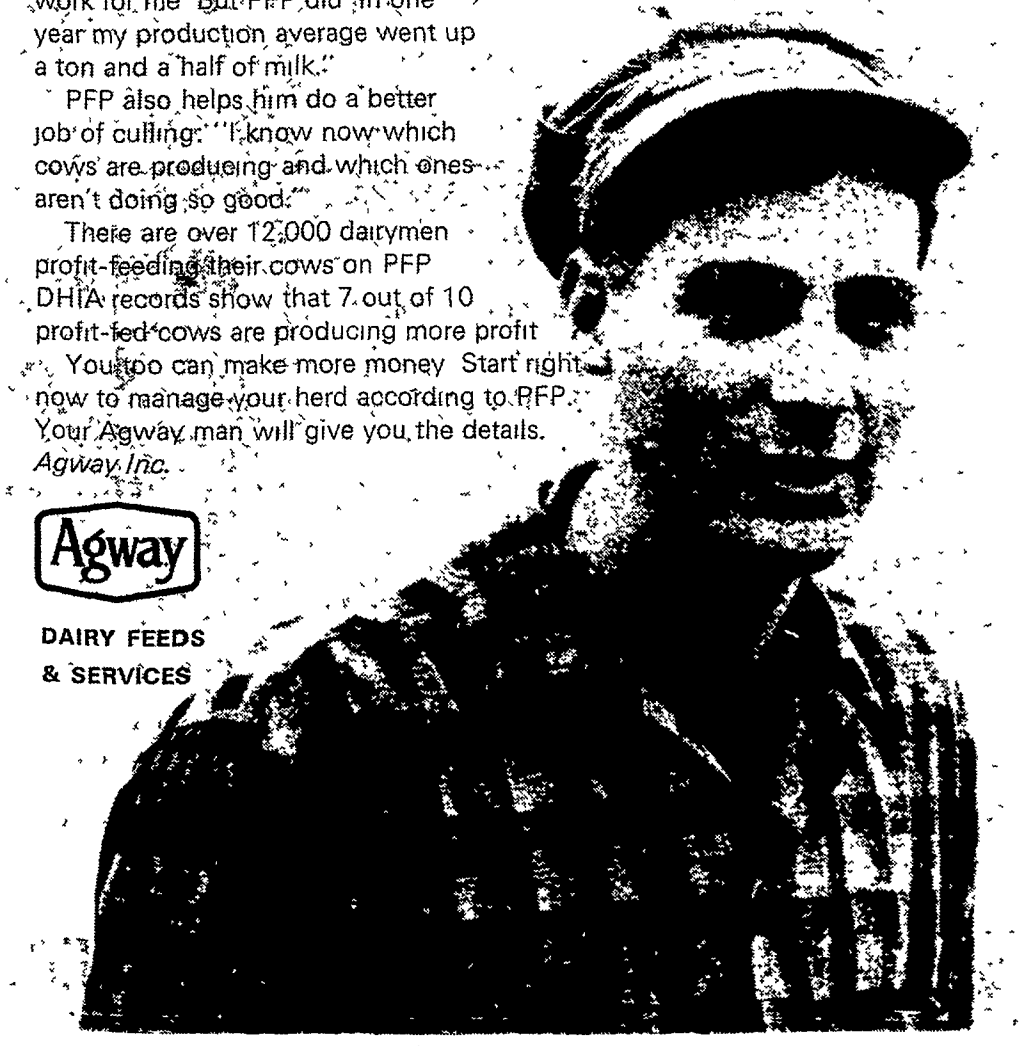
mercial cows steady to 50 lower Canner and Cutters ranged 50-1.00 lower Bulls were 50 lower In the carlot dressed meat trade, Good and Choice steer beef sold 1.50-2.50 lower Heifer beef 1.50-2.00 lower and cow beef steady to 50 lower

He's one of 12,169 on PFP and he's making $136 more per cow.



And he made this gain in one year. That's right. Donald Miller of Bangor, Pennsylvania, increased his income over feed cost by that much in the first 12 months on Agway's PFP.

Mr. Miller had tried another feeding program in 1963-64. "That one didn't work for me. But PFP did. In one year my production average went up a ton and a half of milk."

PFP also helps him do a better job of culling. "I know now which cows are producing and which ones aren't doing so good."

There are over 12,000 dairymen profit-feeding their cows on PFP. DHIA records show that 7 out of 10 profit-fed cows are producing more profit.

You too can make more money. Start right now to manage your herd according to PFP. Your Agway man will give you the details.

From Where We Stand . . .

Some Thoughts On Leadership

The speaker at the 4-H Leaders' Council banquet this week, Daryl Heasley, made some pretty definite statements about "leaders" — what they are; the various types — and he said some things about "the process of leadership" that left us wondering if the whole subject can really be so simply dissected into its separate parts.

True, we do know that leadership develops from a continuing acceptance of responsibility. But good followers — or, as Heasley labeled them, "constructive group members" — also develop by learning to accept responsibility, and to pull their fair share of the load, or more.

Isn't this training in developing good attitudes toward responsibility really the basic reason for the 4-H, scouting, and other youth programs? Then again, can leaders actually be produced through training, or is leadership an individual, innate quality? Probably a combination of these two points would get a little closer to the real answer. A good level of leadership quality is somehow "born" into an individual, and the opportunities for development — like the various youth programs — brings them to the forefront.

One particularly interesting point Heasley made concerned the dynamic quality of leadership We often tend to think of an individual, who happens to be in an important leadership position, as one who will continue to lead regardless of the situation Heasley says that such a person is indeed rare. Leadership is a fluid, situational process, he explained The one whose influence is exerted on a group at a particular time is regarded as the leader As the situation changes, the leadership generally changes Perhaps our national political scene is a good example of that condition

Surely many foreign powers over the years have enviously studied the successful way in which our democratic system plods along year after year while their high-handed, autocratic regimes seldom survive a free election. The secret would seem to lie in the unique cooperative effort of leaders and citizen-members of our "group". And in the fact that, as needs change, new leadership constantly springs from the grass-roots of our society to meet the occasion.

There is some truth in the old statement "where would you leaders be without all us followers?" Our leaders lead by common consent, and they continue to do so only as long as they reflect the common interest. In a dictatorship, the rule is from the top down. It relies very little on common consent or cooperation.

Boost Pork!

The once-lowly porker has been elevated to new heights in the past year or so, both status-wise and cost-wise. However, the pork committee of the National Live Stock and Meat Board has vowed to push the image of pork still higher.

It is true that folks are eating more meat in this country than ever before — 40 percent more than they were a generation ago. But it is also true that per capita consumption of pork has slipped, and is predicted to keep slipping. Beef has long been the status meat in America, and most of the consumption lost by pork has been picked up by beef.

The pork committee, working with the industry, proposes to:

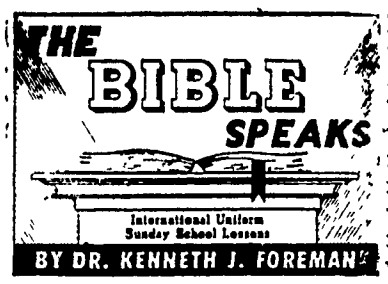
1—get the facts on pork to physicians, nutritionists, and dieticians.

2—try to get more pork on hotel and restaurant menus.

3—strive for more education and promotion in large metropolitan areas, paying special attention to young homemakers

They have some good arguments to offer. Pound for pound, pork is just as nutritious as beef. Through updated breeding and feeding methods the porker has been streamlined with excess fat cut to a minimum And dollar for dollar, it will probably always be a better buy than beef.

If, or perhaps we should say when, we reach the point that our western rangeland is more profitably put to uses other than grazing, it will undoubtedly restrict beef production. Pork producers would be the immediate beneficiaries of such a development since it takes considerably less land to produce a pound of pork than beef.



Why the Church

Lesson for April 3, 1966

Background Scripture Matthew 28 16 20, 2 Corinthians 5 16 21, Ephesians 3 7 13 6 10 20, Revelation 2 and 3
Devotional Reading Ephesians 6 10 20.

"Marriage is a sure cure for true love". "It's the courtrooms that make Justice blind". "Laws kill the conscience". You will hear nonsense like that wherever men gather to discuss what is wrong with the world. The crowning piece of nonsense which usually goes with these others is: "The church kills religion". In other words, just as it is alleged that we would have more true love if we didn't have the institution of marriage, just as we would have better justice if it were not for law courts and lawyers, and better behavior if we had conscience alone to guide us instead of rules and statutes, so we would have purer religion without the churches to choke it So why the church?

Dr. Foreman

Living sense of God

There are three big reasons which include many smaller reasons, why the church is on the scene and ought to be on the scene. Why the church? Because it is indispensable, that's why. It is an institution prone to all the weaknesses of corporations, all the stiffness of human institutions, all the arrogance of bureaucracies; yes, but it is a divine institution and indispensable, all the same. This world is crowded with institutions. The river of time reeks with the waste of human institutions. But the church is indispensable. The church alone exists to keep alive a keen sense of God among men. Oh, you say you know some non-church-members who are more godly than most of the members; or you may know some phony hypocrites in your own church. But the fact remains that by and large, where the church is weak, there the sense of God is weak. How much of the time do you believe in God, really believe in him with all your heart, to say nothing of loving him? Once a week, maybe? Perhaps not so often. To our shame be it said: we forget God more than we remember him. But there stands the church, raising above her deep foundations the spires of faith, the church, affirming week by week in so many words, 'I believe in GOD", and through the week by her very physical existence as a building witnessing to the faith of the men and women for whom she is a spiritual home. No other institution is dedicated to God by faith; no other has witness to God as a primary aim. The church is indispensable.

Man's grandeur and misery

The church is indispensable for another reason also. It is she alone who keeps reminding man both of his grandeur and his misery (to use the two words Pascal made famous). Against all the voices of cynicism and despair, against all who belittle man, against those who see in man only another animal, an organism destined at last for the dust, — the church by contrast keeps telling those who will listen, the truth that man is a child of God, made in the image of God, a creature whose destiny and origin are alike God-determined and God-given.

Church has the answer

The Church, therefore, has the key, the clue, the answer to the great practical riddle and problem of human life. Many a scheme for the betterment of mankind and the transformation of human society has gone to smash on one and the same reef the perversity and weakness (either or both) of human nature What is needed is a power above nature — super-human, no less — which will transform persons from the inside. We need people who have been "born again", people who think and act with God and not against him.

(Continued from Page 1)

Lancaster County assistant home economist Miss Joanne Warner reported that a regional leaders forum will be held in Reading on May 18 The theme of the meeting will be "Developing youth through activities", and will feature Miss Dorothy Emerson from the State 4-H Center

Daryl Heasley, rural sociology extension instructor from Penn State University, discussed the qualities of leadership

Heasley defined leadership as "a dynamic, situational process, as situations change leadership should change Leadership is an influence exerted on a group at any one time," Heasley said And therefore, " a generalized leader — one who continues to lead under all circumstances — is a rare bird these days," he added.

The sociologist said that "leadership as exemplified in our voluntary special interest groups — 4-H, Grange, church, etc — is the ingredient that keeps our democratic system strong " -

Leadership comes "from the ranks of members" he said When foreign visitors observe this fact in action, "it facinates them more than any other thing," Heasley stated

The speaker went on to describe the different types of leaders and members of groups Members, he said, may be classed as "routine, subversive, or constructive" He typified constructive members as "participaters", and said their need is "critical if any group is to be successful"

Leaders also fall into types, Heasley said He described these as "democratic, autocratic, laissez-faire"

The democratic leader, he explained, builds confidence in the group He makes it clear that he's not taking over the group's problem(s), instead he works with the group to help reach a satisfactory solution to the problem "The democratic leader presides," Heasley said, "and the constructive member participates"

"This is the heart of our democratic government," the sociologist concluded, "each plays the role from which he gets the most satisfaction."

Harnish Cow & Hoover Herd Head Feb. DHIA

Beauty, a registered Holstein owned by John M Harnish of 1036 Beaver Valley Pike, Lancaster, completed the highest 305-day lactation for February, according to the Red Rose DHIA monthly report She produced 22,500 pounds of milk, 909 pounds of butterfat with a 4 0 percent test

The second high lactation was completed by another registered Holstein owned by Lloyd Wolf Quarryville R2 She scored with 21,212 pounds of milk and 908 of fat

The high butterfat herd for February was owned by Vincent H Hoover of New Providence R1 His 23 registered Holsteins averaged 1598 pounds of milk, and 61 pounds of fat with a 3 8 percent test

Runnerup was the herd of Donald S. Eby, Gordonville R1 Eby's 41 4 registered Holsteins averaged 1373 pounds of milk and 59 pounds of butterfat

Now Is The Time . . .

By Max Smith, Lancaster County Agent

SMITH

To Read The Label

The growing season is at hand when many sprays and chemicals will be used; these materials can make a big contribution to the crops to be grown providing they are used properly We urge all users to read the label and follow directions carefully, there is no other way to make the applications and be safe

To Be Alert For Termite Swarms

This is the time of the season when termites will be swarming and can be noticed gathering near sunny windows in buildings Do not confuse them with ants because they are also swarming at this time. The ant will have a two-part body with two wings larger than the other two, the termite will have a one-section body with four wings of equal size When termites are found swarming it is a danger signal that they are working somewhere in the building Considerable damage to the wood structure will be experienced unless they are exterminated.

To Sharpen Blades Of Rotary Mowers

The rotary mower is by far the most popular type of mower for lawns and other turf, however, we observe that too many operators allow the blades to get dull and then the grass is beat off instead of cut, this is reflected by a brownish, discolored lawn after mowing Two or more sets of blades are suggested so they may be sharpened during the growing season without delay in weekly mowings.

To Test Soil For Five-Acre Contest

Corn growers who are planning to enter the Pennsylvania five-acre corn contest this year are reminded of the requirement of a complete soil test on the field This test will be of big help in applying the right kind and amount of fertilizer to obtain the maximum yield. In many cases the extra amount of nitrogen or phosphorus added before planting will increase the yield and improve the chances of being a state winner.

DEKALB® XL HYBRIDS
help Illinois Farmer Harvest Record Yield

The modern farming of Clyde Hight, Moweaqua, Illinois, plus DeKalb XL *Breakthru* Hybrids, has more than doubled his average corn yield in five years! From a 91-bushel average, Hight stepped up populations and fertility each year. Yields and profits jumped, too.

In 1965, Hight fertilized for a 200-bushel yield, at a rate of 185-140-200, planted early, and went to 20-inch rows at 27,000 to 30,000 plants per acre. He effectively controlled weeds and insects chemically, and received 31" of rain during the growing season.

His first 388 acres, planted to *short* DeKalb varieties XL-45 and XL-346, averaged 201.17 bu. of #2 Corn per acre. Quite a record for Clyde Hight, *and* DeKalb XL Single-Crosses and 3-Way Hybrids.

***Corrected to 15.5% Moisture.**

Narrow rows help make lots of corn!

DEKALB® BRAND XL Varieties

†These yields were harvested from a *Measured* acre or more by normal mechanical means *without* gleaning, and witnessed by unbiased persons. Grain was elevator weighed and yields calculated in bu. of #2 Corn per acre.

Mowrer Part Of Youth Exchange Program

Walter Mowrer, Marietta R1 was one of five Pennsylvania young adults who served as good will ambassadors recently when they attended the annual meeting of the Junior Farmers Association of Ontario at the University of Guelph Mowrer has been in the FFA program, and is presently a member of the senior extension club

While in Ontario, the group took part in educational programs designed to give training in leadership, citizenship, and community development

As part of an exchange program, Pennsylvania delegates each year attend the Junior Farmers meeting and Canadian delegates participate in the Pocono Conference for Young Adults at Pocono Manor.

The Junior Farmers Association of Ontario, which has over 180 local clubs and 6,500 members, is an organization designed to give rural young adults opportunities in leadership training, community improvement programs, travel, and fellowship.

Henry T. Moon, assistant State 4-H Club leader at Penn State University, accompanied the delegates to Canada.

WIEST CITED BY BEACON FEEDS

Chester G. Wiest of Denver was recently selected as outstanding Beacon Advisor in a group of nine men completing a Beacon Feeds sales-service school.

Wiest was presented with an attache case in recognition of his first place selection by Alem B. Smith, director of operations for the feed firm.

WALTER MOWRER, left, Marietta R1, discusses program activities at the annual meeting of the Junior Farmers Association of Ontario, Canada with Donald Campbell, Elgin county, Ontario. Walter attended the Canadian meeting recently.

FARM WOMEN #8 HOLD MEETING

Society of Farm Women #8 met Saturday afternoon, March 19 at the home of Mrs. Elmer Groff, Rheems, with 30 members and three guests attending. The meeting was opened by the singing of an Irish song, led by Anna Mae Eby.

Mrs. David Witmer led in devotions, followed by a solo (The Lord's Prayer) by Mrs. Betty Ann Diffenbaugh.

Mrs Vera Albert spoke about the history of Mt. Joy and showed old pictures of Mt. Joy.

The business meeting was in charge of the president, Mrs. John Keener. Our Society received and accepted an invitation to visit Society No. 6 on May 7 at the home of Lela Coble. There will be a Spring Rally of Farm Women on Thursday, April 21, at Dillsburg. The Society is making 45 chair back covers for the State Hospital at Harrisburg.

Donations were given to the American Bible Society, Cancer and crippled children. Three waitresses will go to Heart Haven Bazaar, April 26

Hostesses were Mrs Groff, Mrs Charles Shank, Mrs. Warren Chapman and Mrs. Clinton Eby

Next meeting will be held April 16 at the Musser Spring House.

Meat Production Has Increased 3 Times As Fast As Population

Recent figures from the National Live Stock and Meat Board show that with the population of the United States up 41% from 30 years ago, meat production during the same period has jumped 143%.

At present the average American is consuming 22% more meat than in 1935—including 100 lbs. of beef, 60 lbs. of pork and 10 lbs of veal and lamb per year

By producing 33 billion pounds of meat annually, the live stock and meat industry supplies enough for about 175 lbs. of meat per capita—or 32 lbs. more than was consumed three decades ago.

Live stock producers have more than kept pace with our growing population and are turning out more meat of higher quality and at a good price by becoming more efficient in their breeding, feeding, and overall management.

NEPPCO Plans To Expand And Update Exposition Youth Program

Details for a greatly enlarged Youth Program, which is held each year in conjunction with the NEPPCO Exposition in Harrisburg, have recently been released.

At its meeting in New York, the NEPPCO Youth Committee planned a brand new 'Poultry Career Guidance Session' which will give every youngster who attends an opportunity to hear key industry leaders present a picture of poultry career possibilities.

A special 'Youth Project Reports' session has been added to the program. In this period, young people who have developed new or unique poultry projects will be given an opportunity to present them to the entire audience

Following the Project Reports 4-H Demonstrations will be held This year's Demonstrations will include a poultry science class which will enable the 4-Hers to give scientific or technical presentations in addition to the production, marketing or food presentations as in the past.

"In previous years the NEPPCO Youth Program consisted largely of judging events," said Hal Taylor Extension Poultry Specialist from Maryland and the General Chairman of the 1966 Youth Program "But this year we have expanded it and have provided a great many more features for the scores of young people who will come to the NEPPCO Exposition '

Finally according to Taylor, the Committee has updated the judging events themselves A number of former classes have been eliminated because they no longer have commercial applications, and special events in egg judging and educational judging have been added. This last category — educational judging — will permit youngsters who are not members of judging teams to learn some of the techniques used in judging.

The entire Youth Program is sponsored each year by NEPPCO in cooperation with the federal extension service, the national FFA organization and the northeastern states extension services and vo-ag supervisors In addition, over a dozen allied industry firms host the youth during their two and one-half day stay in Harrisburg.

Grades For Slaughter Cattle Are Revised

The U. S. Department of Agriculture has announced revision of U S grades standards for slaughter cattle to bring them in line with grades for beef carcasses

The revision reflects changes made last year in the marbling - maturity relationships in quality grade standards for beef carcasses in Prime, Choice, Good and Standard grades and adoption of yield grade standards which indicate the amount of usable meat in each carcass.

The live slaughter cattle grades, which are used for market news reports futures trading and general market functions were proposed by Consumer and Marketing Service Oct 30, 1965

● Gov't By President

(Continued from Page 1)

though U.S. farmers grossed $43 billion in 1965, they spent $32 billion on expenses other than the needs of their own families," the official told the local association members.

People should not look down on politics, Empie said. He described politics as the art of self-government, and said that it fails to work only when those doing the self-governing fail to do their jobs.

"The only thing necessary for evil to prevail, "Empie quoted, "is for good people to do nothing. What are you people doing to prevent evil in government?" he challenged

In discussing the government's agricultural policies, Empie said, "we need a secretary of agriculture in Washington who knows farming and who will represent farmers, not consumers".

"Keep your eyes and ears open and learn what's going on, then get out and work for representatives who will preserve the America we want," Empie concluded.

Several committee reports were among other orders of business presented. Chief

● Gov's. Conference

(Continued from Page 1)

stated, will be patterned after one held a year ago, and again the Governor will be keynote speaker.

At the 1965 meeting Scranton initiated a study of ways for the further development of the Commonwealth's farm and agribusiness activities. On request from the conference, he named a Committee on Agriculture in advisory capacity to the Department of Agriculture with Secretary Leland H Bull as chairman.

The Governor charged the committee with exploring potentials in farming and related businesses for adjusting to changing conditions and for meeting increased food needs of a rapidly increasing population.

These studies, now completed, will be reported at the 1966 conference as recommendations to the Governor. The reports will be presented by chairmen of six sub-committees, each of which examined a particular facet of the total farm program.

The sub-chairmen are James E. Bobb, Hershey; Carroll P. Streeter, Philadelphia; Dr. R. E. Larson, University Park; William A. Free, Sr., Hungerford; Amos H. Funk, Millersville, and C. L. Rumberger, Pittsburgh.

Secretary Bull and Jack R. Grey, Deputy Secretary of Agriculture, head a committee on arrangements.

among these was the report by Clarence Stauffer's membership committee seconded by state association director Harold Rohrer, that this year's goal had been exceeded. The present membership of 934 moved the Lancaster County PFA affiliate association into first place in the state. Stauffer suggested that a goal of 1000 members for next year would not be unreasonable.

The group heard various other committee reports, and were shown slides by Warren Leininger taken on his recent South American trip.

Agr. Advisers For Vietnam To Be Recruited

The U. S. Department of Agriculture in cooperation with the Agricultural Extension Services of the land grant universities is recruiting a corps of 40 to 50 agricultural advisers to help increase food production in secured provinces of South Vietnam. Secretary of Agriculture Orville L. Freeman announced this week.

The corps will be composed of young county agents and other professional workers in related agricultural activities the Secretary said. The workers are being recruited through the Federal Extension Service.

"These men, well-trained in the practical side of farming and in working with rural people, will help in the peaceful restoration of Vietnamese land to full production," Freeman added. He explained that about 75 percent of that country's population consists of farm people. "They need and welcome the types of technical assistance the United States can provide, as well as fertilizer, seeds, and other farm supplies."

Applicants will be screened and selected within the next month. Then they will be given 6 months of intensive training in the language, culture, and tropical agriculture of South Vietnam.

Later they will be assigned to the secured Vietnamese provinces and will devote at least 18 months to working alongside Vietnam leaders in rebuilding their agriculture

This program is being conducted by the U S Department of Agriculture in cooperation with the Agency for International Development.

Witmers Win Gold Star Award For 4th Year

Raymond F. and Louise A. Witmer, owners of Penn-Del Farm, Willow Street, have been named Gold Star Guernsey Breeders for 1965 by The American Guernsey Cattle Club. This is the fourth year that they have won this coveted award.

Requirements for this award include: that all Guernseys over eight months of age owned by the farm be registered, that the herd included at least 10 registered Guernsey cows with production records made official during the year with at least 70% of them homebred; that the herd was on official AR or HIR-DHIR test with a lactation average at least 15% over the breed average for either milk or butterfat, 305-2x ME. and that 80% of the cows with official records completed during the year were classified with an average score for the group of 82.5% or better.

The production summary of Witmer's herd showed 41 cows with records averaging 12,332 pounds of milk and 614 pounds of fat, 305-2x ME and with an average classification for 37 cows of 85.4 percent.

Witmers will receive a special certificate from The American Guernsey Cattle Club in recognition of their Gold Star Guernsey Breeder Award for 1965.

● Leukosis

(Continued from Page 1)

the state's total farm income from sale of products.

The poultry studies are among twenty different farm research projects that have been started by the Department of Agriculture as part of a new scientific program designed to strengthen the state's farming industry.

The work is being financed by an appropriation from harness racing revenue as enacted by the legislature with the signature of Governor William W. Scranton. Many of the projects are being supported also by matching funds from sponsors.

Most of the research, including the poultry investigations, will be basic in nature and run for at least three years, Bull said.

Umble Holstein Hits ½-Ton Butterfat Mark

BRATTLEBORO, VT — The 1992nd yearly production record exceeding a half ton of butterfat has been completed by a registered Holstein cow, Swampy Hollow Sovereign Mary, owned by John M Umble, Swamp Hollow Farm, Atglen

The Pennsylvania Holstein's official record of production totalled 23,858 lbs of milk and 1,083 lbs of butterfat in 365 days She started her lactation at the age of 9 years and was milked two times daily

Swamp Hollow Sovereign Mary was bred in the Umble herd She was sired by Corncroft S H Sovereign Mac.

Elegant Eats For Easter

SPENCE

Easter is a time of joy. It's a time for hunting hidden Easter baskets, planning spring club meetings, and feting brides at showers and parties. Whether you're entertaining before or after Easter Sunday, you're sure to find occasion for some festive desserts during April.

This Chocolate Cream Butter Torte is truly a spectacular dessert. It's basically a 2-egg cake you can bake in about half an hour. Slice the baked layers in half crosswise, fill between the layers and frost the top with creamy chocolate frosting. Crown the cake with slivered almonds or Brazil nuts for a party look.

CHOCOLATE CREAM BUTTER TORTE

½ cup (1 stick) butter
1¼ cups sugar
2 eggs
¾ teaspoon vanilla
2 cups sifted cake flour
2 teaspoons baking powder
¾ teaspoon salt
1 cup milk

Generously butter two 8-inch round cake pans and dust with flour In a mixing bowl cream butter; gradually add sugar and beat until light and fluffy. Beat in eggs, one at a time. Add vanilla. Sift together flour, baking powder and salt; add to creamed mixture alternately with milk, beginning and ending with dry ingredients. Divide evenly into pans. Bake in preheated 350 degree oven 25-30 minutes. Cool in pans on wire racks 5 minutes. Turn out onto racks and cool completely. Frost with Chocolate Frost 'n' Fill*

CHOCOLATE FROST 'N' FILL

½ cup sugar
½ cup regular all-purpose flour
⅛ teaspoon salt
2 squares (2 oz) unsweetened chocolate, cut up
2 cups milk
2 eggs, slightly beaten
1 cup (2 sticks) butter
1 cup confectioners sugar
1 teaspoon vanilla
Slivered Brazil nuts or almonds

In a heavy 1-quart saucepan mix together sugar, flour, salt and chocolate; gradually add milk. Cook over medium heat, stirring constantly until thickened. Cook 2 additional minutes Stir a small amount of hot mixture into eggs; return all to saucepan Cook 1 minute longer. (Do not boil.) Remove from heat. Press a circle of waxed paper over surface of filling to prevent drying as it cools. Chill. In a mixing bowl cream butter until light and fluffy; blend in confectioners sugar and vanilla. Beating constantly, add chocolate mixture, a small amount at a time, beating just until blended. Split each layer in half crosswise. Spread frosting between each layer and on top and sides of cake. Garnish with slivered nuts. Makes 3 cups.

NOTE: Cake frosted with Chocolate Frost 'n' Fill should be refrigerated until ready to serve.

* * * *

Easter time is the time for eggs and for appropriate egg and bunny designs. Use your imagination to create Easter eggs in a nest from Chocolate Fleck Meringue Shells. Fill the shells with miniature balls of vari-colored ice creams made with a melon ball scoop for an Easter basket look.

CHOCOLATE FLECK MERINGUE SHELLS

4 egg whites (½ cup), at room temperature
¼ teaspoon cream of tartar
1 cup sugar
1 square (1 oz) semi-sweet chocolate, grated medium coarse

In small mixing bowl beat egg whites until frothy. Add cream of tartar and beat until soft peaks form. Continue beating at medium speed while sprinkling sugar, a tablespoon at a time, over egg whites (should take about 4 minutes). Continue beating at high speed, at least 6 minutes more until meringue is very stiff and glossy. Gently fold in chocolate. Cover a baking sheet with brown paper or foil; draw ten 3½ inch circles on paper. Using a spoon or pastry tube shape meringue shells with circles. In preheated 250 degree oven bake 1 hour. Cool; carefully remove from paper. To serve: fill with scoop of ice cream, or several tiny scoops made with a melon ball scoop and top with a sundae sauce. Makes 10 shells.

NOTE: 2 tablespoons multi-colored decorettes may be substituted for grated chocolate.

* * * *

This delicious recipe is prepared the day before and requires no baking.

PECAN CRUMB TARTS

Tart shells:
1¼ cups graham cracker crumbs
⅓ cup butter or margarine, softened
¼ cup sugar

Pecan Filling:
1 cup sugar
1¼ cups hot water
⅓ cup butter or margarine, melted
2 tablespoons all-purpose flour
1 tablespoon cornstarch
½ teaspoon salt
2 egg yolks, slightly beaten
¾ cup halved, shelled pecans, cut crosswise
1 teaspoon vanilla extract

Planning to buy a new
Tractor
See Farm Credit first for
Money

If you've been putting off buying a new tractor because you lack "tractor money", it's time to see Farm Credit. You save money with a Farm Credit loan because you pay only simple interest and only for the actual time you use the money. And your repayment is fitted to periods when you have actual farm income. Call Farm Credit now.

For The Farm Wife

(Continued from Page 10)

2 tablespoons shredded coconut
2 tablespoons coarsely chopped pecans

To make shells: Blend together graham cracker crumbs, butter or margarine and sugar Divide mixture between 8 fluted paper baking cups set in 3-inch muffin pan cups. Press crumb mixture firmly against bottom and sides of cups with a small custard cup or small straight-sided glass. Refrigerate.

To make filling: Melt ⅔ cup sugar in small skillet over high heat, stirring constantly until rich reddish-brown in color. Remove from heat. Adding a little at a time, stir in butter or margarine and ¼ cup hot water. Combine remaining sugar with flour, cornstarch and salt in a saucepan; very gradually blend in remaining hot water Cook over medium heat, stirring until mixture comes to a boil. Blend in caramel mixture. Stir a little of hot mixture into egg yolks. Then return to hot mixture; add pecans and vanilla. Cook and stir over medium heat until mixture returns to a boil. Boil 1 minute Cool; spoon into tart shells. Sprinkle with combined coconut and chopped pecans. Refrigerate overnight. Makes 8 servings

FULTON GRANGE MEETS

Fulton Grange held its regular meeting March 28 at the hall in Oakryn. Master, Gyles H. Brown conducted the business meeting when final plans were made for the "Hat-A-Rama" for March 29 and the annual turkey supper April 2. This supper will be served family style from 4 to 8 p.m. at the Grange Hall.

Legislative chairman, Norman Wood, reported that he witnessed the signing of Holtwood bridge contract by State Secretary of Highways, Henry D. Harral, March 28 in Harrisburg The Grange has been working many years to secure this bridge

Fulton Grange went on record opposing the proposed closing of the Pa. Railroad freight station in Quarryville.

First and second degrees were conferred on a large class of candidates and third and fourth degrees will be conferred April 11.

Fulton Grange will be host to the Lancaster County Pomona Grange, April 16, 8 p.m. at the Grange Hall in Oakryn

Farming holds certain financial hazards . . .

Fortunately, many of them can be eliminated by means of a well-planned program.

Stop at County Farmers Bank today and see Farm Consultant Stanley Musselman, whose office is at 23 East King Street, Lancaster. Whether it's money or just plain advice you need . . . you and he should get together.

Listen regularly to these County Farmers Bank radio broadcasts:

Worth Knowing About Buying Bath Towels

Look for a firm, close underweave for wear and durability.

Check towels for close, thick loops that will give quick drying.

Since comfort of a towel is important, choose towels of soft, medium-soft, or rough texture as you prefer

Choose towels that won't pucker at either end and at the border, but will take laundering without puckering.

Be adventurous about color and design. Do your own color-scheming . . . it's one way to develop a sure touch in decorating

Buy the best quality towels you can afford It pays in all-around satisfaction.

When you find towels with a brand name that give you the service you expect, continue to buy towels with this brand name.

Aluminum Foil In The Oven

Aluminum foil has many uses. But one way not to use it is to line the oven with foil When you line the bottom of the oven with foil, you are redesigning it so the heat may not circulate properly.

The way to use aluminum foil to catch the runover from a pie in the oven is to wait until the pie has been in the oven for a while and

Can a change of feed give you 10% more milk?

Yes!...according to dairymen who have changed to new Ful-O-Pep Cattle-izer Dairy Feed

Many herds on Ful-O-Pep Cattle-izer Dairy for a full year report increases of 10% to 20% more milk—compared to the previous year on another feed. The extra efficiency of Ful-O-Pep is increasing net return per cow considerably for these dairymen.

The new concept in dairy feeding nutrition—Cattle-izer—allows the cow to get as much as 20% more available energy from the same amount of feed. That's why a ton of new Ful-O-Pep Cattle-izer Dairy can give you as much milk-making potential as 2200 to 2400 lbs. of regular feed.

See what Ful-O-Pep Cattle-izer Dairy can do for your profits!

USDA Clarifies Dairy Product Grading Rules

The U. S Department of Agriculture has announced revision of regulations governing grading and sampling of dairy products

Officials of Consumer and Marketing Service which administers for grading service, said the revisions are primarily for clarification Changes include spelling out the distinction between continuous resident and nonresident inspection, specifying a plant survey as a condition of grading, and eliminating the requirement for bonding licensed plant employees working under immediate supervision of USDA-licensed federal or state graders

In addition to changes in wording, the revised regulations include minor adjustments in a new fee schedule for dairy, increasing grading fees for the first time since 1959

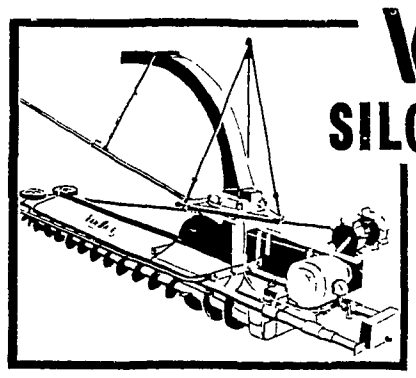
Complete automatic feeding for DAIRY COWS and CATTLE!

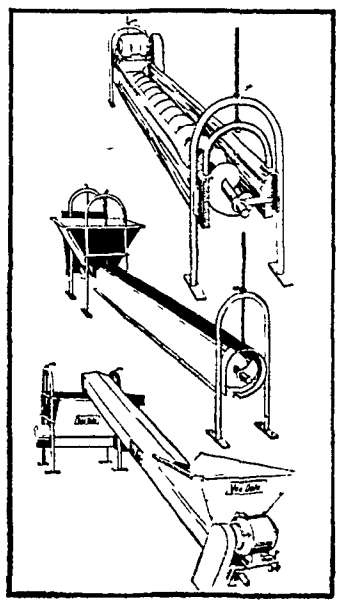
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . and at a lower operating cost Patented V-paddle impellers *throw* . . not blow . . . silage down chute Adjustable drive hubs give positive traction in all types of silage

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10 , nigh capacity 9" auger. Additional auger sections are in 10 units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9 auger rotates within tube Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10 auger sections may be added.

See us for modern automatic feeding equipment

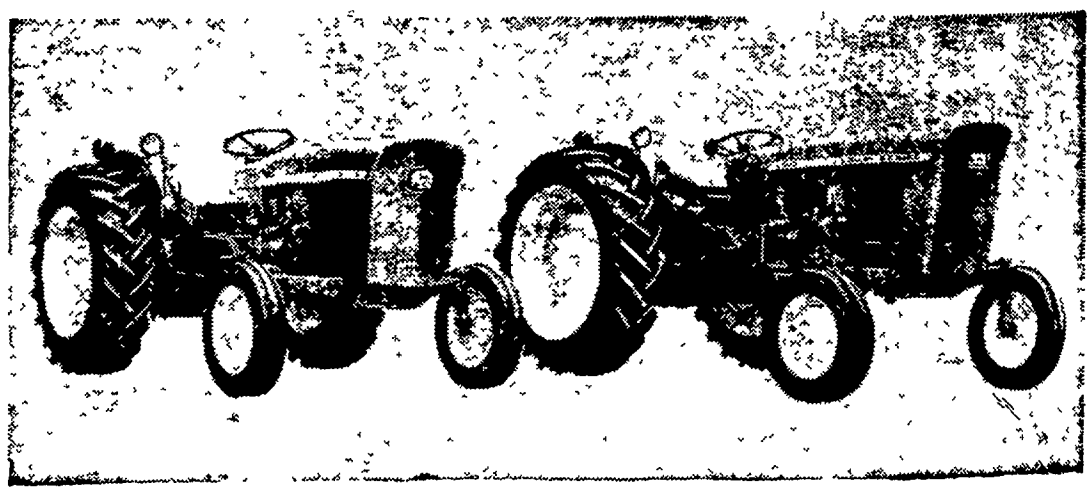
2 power sizes, 3 crop clearances



The 38 h.p. 1020 and 53 h.p. 2020 can be yours with 17, 20, or 24 inches of crop clearance

When we say **2** new tractors, we really mean **6** — because the totally new "1020" and "2020" Tractors are both available in three different models. The LU Model is designed for utility jobs where compactness counts. It has a low hoodline and 17 inches of under-axle clearance. The RU Model has 20 inches of crop clearance, making it just as much at home cultivating row crops, as mowing alfalfa or loading manure. With 24 inches of crop clearance, the HU Model is ideal for the farmer who needs extra clearance and also desires a compact, highly stable tractor. Stop at our store soon . . . see all three models in both power sizes.
